# **Polymorphic Common buzzards in time and space**

Elena F. Kappers

The research presented in this thesis was conducted at the Conservation Ecology Group, Groningen Institute for Evolutionary Life Sciences, University of Groningen, The Netherlands, and at the Department of Behavioural Ecology and Evolutionary Genetics, Max Planck Institute for Ornithology, Seewiesen, Germany.

The study was funded by the University of Groningen and the Max Planck Institute for Ornithology.

Printing of this thesis was supported by the University of Groningen.

Layout: Elena Kappers

Photos: Elena Kappers, Christiaan de Vries, Anneke Alberda, Christiaan Both.

Cover design: Yifan Pei, inspired by a photo of Raymond Klaassen.

# **Polymorphic Common buzzards in time and space**

PhD thesis

to obtain the degree of PhD at the  
University of Groningen on the authority of the  
Rector Magnificus Prof. C. Wijmenga  
and in accordance with  
the decision by the College of Deans.

This thesis will be defended in public on  
Friday 4 December 2020 at 16.15 hours

by

**Elena Frederika Kappers**

born on 6 September 1988  
in Apeldoorn

## **Supervisors**

Prof. C. Both

Prof. B. Kempenaers

## **Assessment Committee**

Prof. T. Piersma

Prof. M.E. Maan

Prof. J.E. Brommer

Voor Opa en Oma Kappers,

# Contents

Chapter 1	General introduction	9
Chapter 2	Classification and temporal stability of plumage variation in Common buzzards	21
Chapter 3	Inheritance patterns of plumage coloration in Common buzzards <i>Buteo buteo</i> do not support a one-locus two-allele model	41
Chapter 4	Directional change of morph frequencies over time in a Dutch population of Common buzzards <i>Buteo buteo</i>	53
Chapter 5	Colour polymorphism predicts exploratory behaviour but not habitat choice during natal dispersal in a raptor species	91
Chapter 6	General discussion	155
